40,845 cases of black fungus reported in Indiasofar: Vardhan

Union Health Minister Harsh Vardhan

NEW DELHI, JUNE 28 /- /A total of 40,845 cases of black fungus or mucormycosis have been reported in the countrys ofar, which 31,344 are rhinocerebral in nature, and the death toll from the infections stands at 3,129, Union Health Minister Harsh Vardhan said today.

Speaking on COVID-19 vaccination drive, Vardhan said, "India has achieved another milestone in COVID-19 vaccination and has overtaken the US in total number of Covid vaccine doses administered so far. The US started vaccinating against Covid from December 14, 2020, whereas the drive was launched in India on January 16." Under the new policy of Covid vaccination, the Union government is procuring and supplying (free of cost) 75 per cent of the vaccines being produced by the vaccine manufacturers in the country to states and union territories, he was quoted as saying in the statement. Till Monday morning (8 am), 32,36,63,297 vaccine doses have been administered in various categories. Vardhan also presented a snapshot of India's efforts to contain COVID-19. The recovery rate has been steadily increasing and stands at 96.80 per cent as on date and 58,578 recoveries were registered in the last 24 hours.

Today is the 46th day in succession where our daily recoveries outnumbered new cases. The GoM strongly reiterated the importance of Covid-appropriate behaviour, the statement said. Higher level of continued awareness building through sustained IEC campaigns was highlighted. NITI Aayog member (Health) Dr V K Paul emphasised on the benefits of mask wearing and hand hygiene. Dr Balram Bhargava, Secretary (Health Research) and Director General (ICMR), also cautioned that the second wave of the COVID-19 pandemic has still not subsided as 80 districts in the country still have high positivity, the statement said. He advised against any laxity at this stage and also explained that vaccines have been found effective against the alpha, beta, gamma and delta variants of COVID-19. Dr Sujet K Singh, Director (National Centre for Disease Control), presented a detailed report on the trajectory of Covid in states and UTs. He presented a granular analysis based on epidemiological findings of the trajectory of the pandemic in each state pointing out critical parameters like growth of cases, concentration of cases in particular districts and other trends like fatality and the variants of COVID-19 driving the infection in the affected states, the statement said. Active Covid cases continue to be concentrated mainly in Maharashtra, Kerala, Tamil Nadu, West Bengal and Odisha, which are reporting growth rate more than the national COVID-19 growth rate, it said. While 19 states are reporting fatality figures in single digit (less than 10), four states of Kerala, Karnataka, Maharashtra and Tamil Nadu are reporting more than 100 deaths daily. (PTI)

CHANGE OF NAME

I, Soumen Guchait S/o. Haripada Guchait, R/o Chingrajole, P.O. Jhikara, P.S. Joyapur, Dt.-Howrah Rural Pin-711401, W.B. will henceforth be known as Soumen Guchait as per affidavit before the Notary Public at Kolkata on 28 June, 2021 both Soumen Guchait and Soumen Guchait is one and same identical person.

UP prepares for Covid 3rd wave, Yogi takes medical aid to grassroots level

OUR SPECIAL CORRESPONDENT

LUCKNOW, JUNE 28 /- /A door-to-door distribution of special medicine kits with syrups and chewable tablets for children under ["Corona Ki Jang Mein Har Jeevan Anmol"] campaign by the Uttar Pradesh government kicked off on Sunday with an objective to prevent a third Covid wave in the state.

Upgrading its armour against the new coronavirus variant 'Delta-Plus' that could stoke a third wave and pose a great threat to the children, the state government has prepared over 50 lakh pamphlets-cum-envelopes in which the medical kits for children will be distributed by the surveillance committees in all 75 districts of the state.

The kits include syrups and chewable tablets of lesser dosage than adults. There are four kinds of kits—for children between 0-1 years, between 1-5 years, between 5-12 year olds and those aged between 12 and 18 years which will now be provided even in the remote regions of Uttar Pradesh.

The kits will be provided to every child showing influenza-like symptoms like cold and cough by over 4 lakh members of more than 60,569 surveillance committees in the rural areas.

The state government has taken up immediate containment measures, including preventing crowds, conducting widespread testing as well as increasing vaccine coverage on a priority basis in districts close to the states where the Delta Plus variant of COVID-19 has been detected.

Over 74,000 surveillance committees operating both in urban and rural areas had played a vital role in the process of timely identification, isolation and treatment of people showing mild symptoms which stopped any further spread.

A widely deployed and efficient testing strategy in Uttar Pradesh has helped in limiting the spread of new cases as it significantly reduced the chance of individuals with undetected virus exposure from roaming freely among unexposed individuals. It is noteworthy that there are a total of 3011 PHCs and as many as 855 CHCs in the state. While the number of PHCs in the urban areas is about 592. The state capital has over 9 CHCs, 28 PHCs, 52 health post centres and 8 urban PHCs, all of which are equipped with advanced technology and all state-of-the-art resources to fight the third wave.

Director General (Medical and Health) Dr DS Negi said that appropriate arrangements

Yogi Adityanath

ments had been made for the distribution of medical kits.

The medical kit is divided into four categories for children and adolescents according to their age and that the medical kit for infants to one year olds and for 1-5 years of age consists of two

3,165 active cases while the percentage of active cases as against the total confirmed cases is just 0 per cent.

Leading in terms of conducting maximum COVID tests, Uttar Pradesh has tested as many as 5,70,85,424 samples for the coronavirus infection.

'Corona Ki Jang Mein Har Jeevan Anmol'

vials of Paracetamol syrup, one vial of multi-vitamin syrup and two packets of the 'ORS' solution.

Between 6-12 year olds and those aged between 12 and 17 years will be provided eight paracetamol tablets, seven multivitamin tablets, three Ivermectin tablets of 6 mg each and two packets of ORS solution.

DS Negi further said that preparations were on a war-footing to ensure elaborate arrangements in terms of availability of beds and hospitals for children in every district.

Intensive measures to tackle third wave: Chief Minister Adityanath has asked the state health department to expedite the process of setting up PICU/NICU across the state. "Top priority should be given to the establishment of Pediatric ICU/ Neonatal ICU beds in all the districts by June itself," he directed officials.

The government has also ensured that there is an availability of all necessary equipment including BiPAP machine, Pediatric ICU, mobile X-ray machine. There should be direct communication with their manufacturing companies to ensure prompt supply.

As the work of the first phase of doctors and nursing staff has been completed, with the help of these, other health workers should be trained, the CM instructed.

The government also stated that the process of appointment to the vacant posts of pediatric specialists will be completed soon.

Active caseload in UP drops to 3,165: Uttar Pradesh recorded 222 fresh Covid-19 cases on Saturday at a positivity rate of 0.07 per cent, the lowest this year so far while the recovery rate has jumped to a splendid 98.5 per cent.

The state is left with just

ernment has also directed officials to increase the facility of genome sequencing for its test study.

In this regard, genome sequencing of 100 samples has been started at the KGMU, Lucknow for in-depth investigation of COVID-19 patients. The results of these samples will be helpful in making necessary efforts to hedge against the threat of the Delta Plus variant.

"Testing facility should be increased in the medical institutions of Varanasi and Noida on the lines of KGMC and RML, Lucknow," said Adityanath at a high-level meeting in the state capital. He said that if required, co-operation from the private sectors will also be taken.

The UP Government has also instructed the state health department to adopt a proactive and multifaceted approach and formulate a stringent action plan in all the districts to tackle the 'Delta Plus' variant that could lead to a possible third Covid-19 wave, mostly affecting children.

No shortage of medical equipment: The Adityanath government has ensured availability of all necessary equipment including BiPAP machine, Pediatric ICU and mobile X-ray machine. There should be direct communication with their manufacturing companies to ensure prompt supply.

To protect the children who are at a much higher risk as predicted by the experts, the Uttar Pradesh government has also initiated sample collection at all the bus stands, railway stations, and airports to trace the new deadly variant.

The UP government has already stated that the process of appointment to the vacant posts of pediatric specialists will be completed soon.
